OCTA in cooperation with The California Department of Transportation (Caltrans) is widening the San Diego Freeway (I-405) between State Route 73 (SR-73) and Interstate 605 (I-605). The project will improve 16 miles of I-405 between the SR-73 freeway in Costa Mesa and I-605 near the L.A. County line.

The project includes adding one regular lane in each direction from Euclid Street to I-605 and making improvements to freeway entrances, exits and bridges. It also will construct the 405 Express Lanes, two lanes in each direction from SR-73 to I-605.

PQM supports OC 405 Partners Joint Venture by providing Quality Organization leadership positions such as the Quality Manager, Design Quality Manager and the Construction Quality Manager for this \$1.2B Design-Build project. We are responsible for the development, implementation and ongoing monitoring of the Quality Management Program. We are currently in the implementation and training phase.
